### **Port of Argentia 2007 Argentia Shipping News - April 2007**

The Argentia Port Corporation Inc. (APC) will provide current information relative to our Port activities, and we invite you to bookmark our website for future reference. Current activities:

- The newly constructed Fleet Dock extension has been in operational mode since October 2006.
- The AMA/APC attended the ACPA Annual Government Interface Conference that was held in Ottawa on Feb 26 - 28, 2007. The focus of the conference was on Canadian port security and world security issues.
- Eimskip container operations continue in Argentia. The Port is an integral part of the shipping network between Iceland and the USA.
- St. Lawrence Cement is expecting the first shipment of cement late April 2007. Off-loading facilities have been reconfigured so that traffic along the entire dock is possible during the discharge of cement from the ship.
- Argentia Freezers & Terminals Ltd. (AFTL) operations are ongoing. AFTL has recently installed surveillance cameras around the perimeter of their operation zone.
- Security enhancement projects for the Port have been awarded to Brownco Inc., and the security fencing around the port property perimeter has commenced. Other security projects are slated to start and run concurrently to completion in 2007.
- The small boat basin maintains a 100% full rate, with a waiting list of potential tenants.
- Canadian Coast Guard and DFO ships continue to visit the Port of Argentia when activity in the area necessitates.
- Updated port information has been forwarded for inclusion in the Lloyd's "World Ports" publication.
- A new Schedule of Rates for all fees charged by the Port of Argentia becomes effective April 1, 2007.
- Operations, safety, and security training is an integral part of day-to-day Port operations by all stakeholders.

If you have any questions or suggestions, please do not hesitate to contact us at:
